

** AUSTRALIA [and non]. 5055, Nov 25 at 0730, JBA carrier maybe Radio 4KZ; no signals from the other Pacificans on 5045, 5040, 5035, 5020. Solomons has been missing lately per Ron, and now there are reports of political unrest, as in RNZP news at 1300 on 7390 as monitored by Rodney Johnson, MN, Nov 24:

``A police station and several shops have been set on fire by looters in Solomon Islands after what started in the morning as a peaceful protest, calling for the prime minister Manasseh Sogavare to step down, turned ugly around mid-afternoon.`` UT Nov 25: ``Authorities are calling for calm and accountability in Solomon Islands, after political protests developed into looting and buildings were burned in the capital Honiara`` (Glenn Hauser, OK, WOR)

** BRAZIL. 6150, Nov 25 at 0726, JBA carrier, maybe the new R. Saturno at an hour when Manuel Méndez has been hearing it in Spain. Aoki does not know about it yet, but shows R. Europe, Germany on 6150 starting at 0700. OTOH, EiBi shows that one from 0900 with Saturno 24h (Glenn Hauser, OK, WOR)

** BRAZIL. 9819.124, Nov 25 at 0719, JBA carrier, no doubt the always off-frequency R. Nove de Julho; one of two ZYs on air overnight on 31 m, the other:

9666.252V, Nov 25 at 0721, S8-S5 music from R. Voz Missionária, a reliable overnight signal which has been drifting slowly upwards. Nothing on its lower frequency 5939+ (Glenn Hauser, OK, WOR)

** BRAZIL [and non]. 6180, Dec 1 at 0245, CRI Chinese via CUBA dominates. I think there is music from RNA way under it, but // 11780 is also so weak I can't match them for sure. At 0300, La Voz Alegre from MADAGASCAR takes over 6180 (Glenn Hauser, OK, WOR)

** CANADA. Nov 26 at 0724-0745 UT, another quiet night for LW beacons, only minor storms in NAM along the BCS/BCN border and the Tamaulipas coast. Skipping relays of some major Canadians stronger than usual:

276 MCW kHz, Nov 26 at 0730 UT, dash and YEL, 200 watt NDB at Elliott Lake, Ontario, to be decommissioned 2022-01-27. I always wish this were YELLOWknife NWT, but that's ZF, 3800 watts on 356.

269 MCW kHz, Nov 26 at 0732 UT, dash and UDE, 25 watt NDB at Delta, Manitoba

218 MCW kHz, Nov 26 at 0734 UT, dash and YUY, 500 watt NDB at RoUYn-Noranda, Québec, a new one for me

351 MCW kHz, Nov 26 at 0738 UT, dash and YKQ, 500 watt NDB at Fort Rupert / WasKaganish, Québec; also audible tuned to 350-USB QRMing my regular RG in OKC (Glenn Hauser, OK, WOR) See also USA for five more

** CANADA. 401 MCW kHz, Nov 28 at 0734 UT, dash and YPO, 500 watt ND beacon in Peawanuck, Ontario. First audible tuned to 402 USB where mixing with HU Hutchinson KS really on 404. Only one logged before offdozing tonight despite entire continent clear of any Blitzstorms.

YPO, logged a number of times since Dec 8, 2018 when I appended:
``love these colourful placenames. Wikipedia: ``Peawanuck is an isolated Cree community in the Kenora District, Ontario, Canada. It is located near the confluence of the Winisk and Shamattawa rivers, about 35 km from the Winisk River's end in Hudson Bay. Its population is 237`` --- that does not mean it is anywhere near Kenora in the SW corner of the province! (Glenn Hauser, OK, WOR)

** CHINA. 6100, Nov 27 at 2245, anniversary of Commie Party in Spanish, with music; about China, not Cuba: CRI this hour via Beijing site (Glenn Hauser, OK, WOR)

** CHINA [and non]. 7500, Nov 27 at 2254, two Chinese mixing for a total of S9+10: VOA via THAILAND, and imperialist ChiCom CNR1 jamming radio war, this hour only (Glenn Hauser, OK, WOR)

** CHINA. CNR1 WOOB jammer survey Dec 1 at 0005-0010, not in the order tuned, JBA u.o.s.: None in the 10s; 11410 S6-S5; none in the 12s; 13020 S5-S4; 13130 S9-S8 with flutter; 13920; 14920 S9-S7; 14980; 16160 (Glenn Hauser, OK, WOR)

** CUBA. 9700, Nov 27 at 0723, RHC English on this new frequency, S9 and undermodulated --- and by now NONE of The Cuban Five are still on the air on 59 & 49 metres! Not clear when it start but not yet on when I checked ~7 hours earlier. Tnx for tip last night in BDXC-UK:

``Radio Havana Cuba (RHC) English heard on 9700 kHz this morning [Nov 26], instead of 6165 kHz, from 0520 UTC tune-in. In parallel to regular strong 6000 kHz. At 0600 UTC, 6000 and 9700 were joined by usual frequencies 5040 6060 and 6100 kHz in English. 9700 is difficult to hear here in the UK as Voice of Turkey uses 9700 in Turkish 0400-0700 UTC. But RHC was audible further west in USA on 9700 using KiwiSDRs e.g. in Kansas or Colorado. (RHC had used 9700 in B20 period for a few weeks from November 2020 but then had reverted to 6145 if I remember correctly). 73 Alan Pennington, Caversham, UK`` (Glenn Hauser, OK, WOR)

** CUBA. 11880, Nov 27 at 2246, jazz, presumably the RHC English hour; what else? Spanish defectively: 13740 S9+40 of dead air, then cuts on

with historical talk, stronger than // 11760; 11850, S9+10 and
suptorted; 9710, S9+25 but suptorted,

Note: the official RHC B21 sked shows the Antillas angle goes from
9710 to 9650 at 0000-0500, yet to be confirmed. Both appear in green
for reasons unknown (Glenn Hauser, OK, WOR)

** CUBA [and non]. Checking out what RHC is doing during prime time,
UT Mon Nov 29, where something is always multiply wrong:

New 9700 is already on at 0217 in English about José Martí, S9+15/20.
This is also splashing upon 9710 where RHC is still in Spanish, only
S9+10 and also distorted with music. NOT (yet?) on 9650 replacing 9710
as per official schedule. And // 5040. 9710 still at 0353.

6000 is the only 49m channel on the air at 0233 and in English. 9700
apparently replaces 6165, good news for 6160- WBCQ. 6000 still RHC
English at 0655.

9700, at 0353 RHC English has faded way down and is now about equal to
CCI from Voice of Turkey IS, prior to 0400 Turkish which is
legitimately registered here until 0700, 500 kW at 310 degrees for W
Europe, but also USward. Rechecked at 0505, 9700 RHC is now back to VG
S9+27 and no sign of TRT - which has its own erroneous issues. But at
0557, 9700 bears nothing but Turkish music, no more RHC, which a
previous night stayed on 9700 only in English well past 0700.

6060 RHC Spanish is now on at 0404, S9+10/15, from *0400? Still only
6000 on 49m in English. At 0505, 6060 RHC Spanish has heavy Qu`ranRM
which is RTA Algeria via FRANCE as legit sked 0400-0600, 500 kW, 160
degrees from Issoudun. At 0602, 6060 has RHC English in the clear,
S9+27. At one of the English chex, I forget which, RHC was talking
about Fidel's support for Timor Leste; whatever became of them?

6100, usual RHC English after 0500, is not to be heard at all at 0505,
0602. Also at 0602, still no 6165 or 6145 English even tho 9700 is not
on either. At 0654, 9700 does bear the TRT IS again, S2-S8 with
flutter. All logs before 0654 on the KB0FX SDR in MO, then direct.

The Other Side:

Yes, Cuba is a Failed State --- The government continues to complain
about US attempts to depict Cuba as a failed state.
Dimas Castellanos La Habana 29 Nov 2021 - 16:34 CET
https://diariodecuba.com/cuba/1638200078_35839.html
(Glenn Hauser, OK, WOR)

** CUBA. 9650, Dec 1 at 0013, still no show of RHC Spanish on new
scheduled frequency, nor on ex-9710, rather China there. RHC is still

on 9535. Something's always wrong at RHC. 0130 check: 9710 China in Spanish with music background. But:

9640, Dec 1 at 0133, RHC is here! Not 9650 but very distorted and splattering up to 9650 on remote in Missouri; // 9535. Something's always wrong at RHC. 0228 check, 9640 is S9, undermodulated and not distorted direct.

9700, Dec 1 at 0228, RHC English S9/+20, // 6000 only (Glenn Hauser, OK, WOR)

** CUBA. 9700, Dec 1 at 0715, RHC English at S9+20, still on this late while none remain on 5 or 6 MHz bands. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** ECUADOR. 6050, UT Mon Nov 29 at 0231, tune-in to national anthem which I had not heard in a long while, as the sad 1 kW remnant of HCJB is signing off earlier than on UT Sat & Sun. What surprises me is how strong it is into Missouri SDR, S9/+15, much better than I ever get it direct; until 0232*, and SAM shows carrier offset minus 5.8 Hz (Glenn Hauser, OK, WOR)

** EGYPT. 9899.59v, Nov 30 at 2212, R. Cairo still trying, strong but extremely distorted in talk which is probably English; via UTwente (Glenn Hauser, OK, WOR)

** EGYPT. 9900V, Dec 1 at 2108, R. Cairo S8-S9 into UTwente, but the worst sound yet! Extremely distorted talk, language unknown. Synch mode driven crazy, trying to lock onto, but rapidly going in and out of lock with exact frequencies flashing too quickly to copy, but some of them about 9899.742, 9899.867 and occasionally on plus side like 9900.027. 2113 adding random tones to mix, not sure if transmitted or messing up the SDR. Mis-time signal at 2115:43; and I comprehend nothing but ``31 meter band`` in sign-on; 2128 checking direct I find only a JBA signal on about 9899.58. Something's still egregious in Egypt (Glenn Hauser, OK, WOR)

** FRANCE. 15285.052V, Nov 27 at 1620, algo JBA off-frequency and wavering. Aoki shows this hour is R. Manara International in Hausa via Issoudun site. With my habitual USB bandscanning in 1-kHz steps, these stick out sorethumbedly. See also SAO TOME (Glenn Hauser, OK, WOR)

** FRANCE? 18127 USB, Nov 29 at 1529, after some contacts, CQs repeated from TM220AYT ?? Very strange callsign. The TM prefix belongs to France, or overseas France. No hits at QRZ.com lookup nor in broad Google search. The penultimate letter may be wrong, but am rather sure there are *three* numbers in it. However searching QRZ.com on TM220*** we get one hit:

``TM220BP France flag France Patrick & Franck MENARD
from 2020 qsl only via Buro France QSL: F4GFE,REF BUREAU - NO E.QSL``
which was a special event in 2018y about the 220th anniversary of
``The Battle of the Pyramids, also known as the Battle of Embabeh, was
a major engagement fought on July 21, 1798 during the French Invasion
of Egypt...`` --- so another such TM220 call is possible, but why
can't I find it? Perhaps some of our hams know about it (Glenn Hauser,
OK, WOR)

** KASHMIR [non]. 15170, Nov 30 at 1607 check, not only direct but at
UTwente, no signal from Kashmir Civitas for the second Tuesday in a
row, via ROMANIA; so last week's absence not a fluke, suspended again
or finished (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6925.0 AM, Nov 27 at 2242, S9-S7 of dead air,
presumably some pirate. Halloween 365 reported a bit earlier:
<https://www.hfunderground.com/board/index.php/topic,89609.0.html>
(Glenn Hauser, OK, WOR)

6920.0 AM, Nov 27 at 2243, S8-S6 of undermodulated music, some pirate.
Nothing reported now in HFU but R. Pushka after 0025?
<https://www.hfunderground.com/board/index.php/topic,89612.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6925 AM & 6919.9 AM, Nov 29 at 2324, VP signals
traces of music, I keep getting if nothing else on the pirate band.
HFUnderground today has a number of unID reports on 6925, 2101-2420:
<https://www.hfunderground.com/board/index.php/topic,89702.0.html>
and then 0015-0216+ as Coastal Rock Radio, maybe not the same one:
<https://www.hfunderground.com/board/index.php/topic,89710.0.html>
and nothing on 6919.9 (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6919.9 AM, Dec 1 at 0011, unID JBA music, only
pirate now, none on 6925 for a change. Nothing reported now in HFU,
even as ``6920`` where there have been some logs recently at other
times (Glenn Hauser, OK, WOR)

** OKLAHOMA. 530, Nov 29 at 0704, surprised to hear Fox News as there
are not any US stations here, just Canada and Cuba. But seems to be //
local 960 KGWA as well as whatever follows. Must be some kind of
external mixing product with other local 1390 KCRC at 430 kHz
separations. Does not go away with attenuation, but maybe caused by
unusually clipping the inside random wire onto the adjacent YB-400?
(Glenn Hauser, OK, WOR)

** PHILIPPINES. 6150, Nov 27 at 2244, S9-S8 of talk in English and
music, listed this hour as BBCWS via Tinang; no luck checking for R.

Saturno, Brasil (Glenn Hauser, OK, WOR)

** SAO TOME E PRINCIPE. 15460.070, Nov 27 at 1622, another JBA off-frequency besides FRANCE 15285+. This one is VOA Pinheira scheduled this semihour in Kir = Kinyarwanda/Kirundi (Glenn Hauser, OK, WOR)

** SPAIN. 9690, Dec 1 at 2130, VP JBA signal of S7 about even with noise level, presumably REE but hardly propagating; even less on 11940 and 12030. WWV reports: ``Solar-terrestrial indices for 01 December follow. Solar flux 86 and estimated planetary A-index 16. The estimated planetary K-index at 2100 UTC on 01 December was 3. Space weather for the past 24 hours has been minor. Geomagnetic storms reaching the G1 level occurred`` (Glenn Hauser, OK, WOR)

** THAILAND. 13750, Dec 1 at 0003, R. Thailand news in English with American accents, S9-S6 with flutter, best heard here in some time (Glenn Hauser, OK, WOR)

** TURKEY. 5960, re squeal I reported, et al., Alan Holder replies on the WOR iog:

``Not a new problem. One of the transmitters has shown this fault for several months. For a long time it was parked on 11530/9525 jamming Denge Welat. But they tend to switch the transmitters around.

I e-mailed Hasan Altan of TRT engineering about the squealy modulation on August 5. He promised to pass this information on to the engineers at Emirler, and he would monitor the situation. Nothing happened for several months, so I e-mailed him again on October 19. So far, no reply.

Another of the transmitters suffers from slight hum and a lower modulation output. You have no doubt observed this on several occasions when listening.

Regarding your often reported missing 2200/2300 English broadcast, I suspect it might be their time for transmitter maintenance. Including the jammer on Denge Welat, all five transmitters are in use at one point (1400) during the day. but this drops down to only one or two between 2300 and 0200 UT. Alan Holder, G4ZBH, Isle of Wight, U.K.`` (Glenn Hauser, OK, WOR)

** TURKEY. 9700, TRT clashes with CUBA: q.v.

** U S A. Nov 26 at 0724-0745 UT, another quiet night for LW beacons, only minor storms in NAM along the BCS/BCN border and the Tamaulipas coast.

338 MCW kHz, Nov 26 at 0724 UT, RYN, 400 watt ND beacon at Tucson / RYan AZ. Mixing with something else, maybe TU Tulsa or TT Stuttgart AR heard before. Careful not to confuse with RYD in FL.

329 MCW kHz, Nov 26 at 0726 UT, AAA, 25 watt NDB at Lincoln / Abraham IL. Tuned to 327-USB.

293 MCW kHz, Nov 26 at 0728 UT, UI, 30 watt NDB at Quincy IL, mixing with FBY, 25 watts at Fairbury NE: the latter normally dominant alone, and no sign now of TOR in WY. These three are the only USAs on 293 per dxinfocentre.com

201 MCW kHz, Nov 26 at 0737 UT, BV, 25 watt NDB at Bartlesville OK. Seldom heard

379 MCW kHz, Nov 26 at 0744 UT, DL, 50 watt NDB at Duluth MN. Now clearly this and not TIL, with the D properly sent without pause (Glenn Hauser, OK, WOR) See also CANADA for four more this session

** U S A. 2097.3 CW, Nov 27 at 0730 UT, the single-letter beacon A is back!!! JBA. I bandscan past here almost every night and have always been alert for it since last logged in *2020*:

``UNIDENTIFIED. 2097.3, May 31 at 0619 UT, single-letter beacon A is JBA in noise level, every dekasecond. Altho a reliable source has assured us it is not heard as a local signal in Quartzsite AZ, I see in classaxe.com it is still placed in Quartzite [sic] with a period of 10.14 seconds, last logged by anyone there 2020-08-05. QZ is about 17 miles from the CA border on I-10``

With a 10-second period, one must park on 2097 USB for at least that long. I keep listening a while and find it has sometimes faded out. It barely makes it vs noise level of S7-S8 in USB mode, or S8-S9 in AM mode. Now not to be found on classaxe nor LWCA lists. Also note the numerical date cited ``2020-08-05``, but that was posted on May 31, 2020, when Aug 5 would have been in the future. Did that mean May 8?? Not the usual format, but another failure of ambiguous numerical dating, rather than not being too lazy to spell out the month!

4095.65, Nov 27, 2021 at 0728, the Desert Whooper beacon also JBA with sweeps upward, as often heard no more than that and not always logged (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 2097.3 kHz, Dec 1 at 0207 UT, single-letter beacon A is JB audible every dekasecond, from anywhere but Quartzsite AZ (Glenn Hauser, OK, WOR)

** U S A. 13563.5, Nov 26 at 1505 UT, HIFER beacon YSO, Yellow Springs, Ohio, JBA call repeating vs CODAR but definitely gaining on it. No K6FRC on 13565 now (Glenn Hauser, OK, WOR)

** U S A. WORLD OF RADIO 2113 monitoring: I missed confirming final WRMI repeats, UT Thu Nov 25 at 0130 on 5010, 9395. Did anyone hear them? (I seldom get any replies to that question, making me wonder if anyone is trying; or reading this?)

WORLD OF RADIO 2114 Contents: Argentina, Australia, (Belarus`), Brasil, Canada and non, China, Cuba, Egypt, Europe, (France), Germany, Guam and non, Indonesia, Iran, Italy, (Kaliningrad), Korea North & South, Myanmar and non, New Zealand, North America, Romania, Russia, (Sicily), Sudan, (Taiwan), Turkey, USA, (Uzbekistan), Venezuela and non; EDXC and SWL Fest zooms; Mobile and Fence Beverage DXing; propagation outlook ()Countries mentioned but not in order

Our non-commercial broadcasts and website depend on voluntary support. Thanks this week to Steve McGreevy, N6NKS, Keeler CA for a contribution via PayPal to woradio at yahoo.com and says, ``L000000NNNGGG overdue, Glenn(!), and thanks very much for your endless wonderful work for the DX community!``

One may also contribute by MO or check in US funds on a US bank to Glenn Hauser, PO Box 1684, Enid OK 73702 (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2114 monitoring: confirmed first SWBCs, UT Friday November 26 at 0130 on WRMIs: 5850 good direct and S9+30 into MO SDR; 7780, 9+10/15 into UTwente above some lightning crashes; nearest storms in Corsica, central Mediterranean.

Also confirmed UT Fri Nov 26 at 0330 on WRMI 5985 southward; VP to TWR Boa Vista SDR; JBA to Trinidad; nor to TWR DR; axually better off the back to USA SDRs: S5-S6 to Knoxville, but ACI 5980 jamming; best to Uniontown PA, S9 but SAM reads +95 Hz carrier; yet others such as Querétaro, S7-S8 shows only -7 Hz. I think the Uniontown is miscalibrated. Next:

0130 UT Thursday WRMI 9395 to NNW, 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2114 monitoring: checking 7290 IRRS via BULGARIA early at 1903 Fri Nov 26: already on with `Feature Story News, Spotlight`; via UTwente, only S6-S7 with heavy ACI from 7295 China, even when tuning LSB only. Also on 918 kHz, Italia AM, via Noale remote a few seconds apart, S9+5/15 above Spanish CCI and also

ACI from 909, not much on 927; 1905 'UN News in Brief'. 1909 'Country Jamboree' with tunes including 'Wake Up, Little Susie'. But only filler until

1915 IRRS SW ID falsely claiming that it's in reduced carrier SSB; and right into WOR 2114 as scheduled; recheck ending at 1944 so played to completion, but had faded down further, still heavy 7295 ACI; and into music, hymns.

Also confirmed repeat Fri Nov 26 at 2130 on 918 kHz only, S9+10 into nearby Noale, with SAH and het from an unID carrier about 919.50 -6 Hz which was not there earlier. Also checking the 909 kHz ACI: it's in Romanian. Three different stations are listed, so three different programs: 200 kW Cluj with R3 and Hungarian/ethnic; 50 kW Timishoara with pgm 1; 25 kW Constantza with R4.

Also confirmed Fri Nov 26 at 2330 on WRMI 5950, S9+10/20 direct.

Also confirmed UT Saturday November 27 at 0230 on WRMI 9395, but can't find a good signal anywhere, tnx a lot, MUF! VP to MO and MB SDRs, nothing to WI, despite 355 azimuth; best offbeam at Maryland S8 vs high noise level. Next:

1030 UT Wednesday WRMI 5850 to NW
2200 UT Wednesday WBCQ 7490v to WSW
0130 UT Thursday WRMI 9395 to NNW, 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2114 monitoring: confirmed Saturday November 27 starting at 2036.5 UT on WA0RCR, 1860-AM, MO, S9+10 into KB0FX SDR.

Also confirmed UT Sunday November 28 at 0030 on WRMIs 7730 and 5950, both VG direct; program sked now shows something else now on 5950, maybe from next week?

Also confirmed UT Sunday November 28 already near the end at 0422 UT

on WA0RCR, 1860-AM, MO, S9+10 direct and finishing at 0425.5, so started really early circa 0356: tune in before 0400 to be safe and listen to the variable-length ham shows.

Not awake at 1330 Sun Nov 28 for WOR on WMRI Europe, via Channel 292, Germany on 9670. Did anyone hear it? roger in Germany reports:

``WMRI [sic] via 9670 kHz 1300-1330z, WOR2113
Nov 28 at 2:22 PM [= 1322 UT]
https://wmrieurope.com/wrmi_schedule/ [sic]
"Now Playing: Glenn Hauser - wor2113.mp3"
9670 kHz // webstream
http://14843.live.streamtheworld.com/SAM07AAC238_SC
roger``

So he axually heard last week's WOR before 1330 on 9670? When I look at the schedule page at 1650, there is nothing about WOR, rather 1300 as Bex Carter, 1330 nothing, 1400 Classic Rock. Next:

2100 UT Sunday IRRS 918-Italy
2330 UT Sunday WRMI 5950 to NNW
2330 UT Sunday WRMI 9955 [jammed?] to SSE
0030 UT Monday WRMI 7730 to WNW
0130 UT Monday WRMI 9395 to NNW
0400vUT Monday WBCQ 6160v Area 51 to WSW
2330 UT Tuesday WRMI 9955 to SSE [jammed?]
1030 UT Wednesday WRMI 5850 to NW
2200 UT Wednesday WBCQ 7490v to WSW
0130 UT Thursday WRMI 9395 to NNW, 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2114 monitoring: Neil Gates of WMRI Europe explains what happened with WOR 2113 airing before 1330 instead 2114 after 1330 Sunday Nov 28 on 9670:

``Hello Glenn, On Friday/Saturday a storm (storm Arwen) with winds of 90 miles per hour hit this part of the United Kingdom taking out power supply and internet connectivity. Our programmes are fed to the TX in Germany from a remote server which without power or internet we were unable to access so were unable to schedule yesterday's programming correctly for relay from Channel 292. Power and internet have now been restored and programmes will return to normal next Sunday December 5 with WOR returning to its 13.30 UT transmission time. My sincere apologies for any inconvenience caused. 73 Neil Gates, WMRI Europe``
-- Tnx and sorry you had such problems.

WOR 2114 confirmed Sunday November 28 from 2102 UT on IRRS SW via AM Italia 918 kHz, via nearby Noale SDR.

Also confirmed, Sun Nov 28 at 2330 on WRMIs, interior random wire into DX-398: 5950 good; 9955 good but with pulse jamming, better before 2400.

Also confirmed, UT Mon Nov 29 at 0030 on WRMI 7730, good on ATS-909 with shorter clip-on

Also confirmed, UT Mon Nov 29 at 0130 on WRMI 9395, S9+20/25 into Missouri SDR

Also confirmed, UT Mon Nov 29 at 0400 on Area 51 via WBCQ 6160 minus 54 Hz = 6159.946, S9 into MO SDR; and no ACI since Cuba q.v. moved to 9700. Next:

2330 UT Tuesday WRMI 9955 to SSE [jammed?]
1030 UT Wednesday WRMI 5850 to NW
2200 UT Wednesday WBCQ 7490v to WSW
0130 UT Thursday WRMI 9395 to NNW, 5010 to S
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2114 monitoring: confirmed Tuesday November 30 at 2330 on WRMI 9955, fair-good, sufficient into random interior wire and DX-398; some jamming maybe audible at fades. Next:

1030 UT Wednesday WRMI 5850 to NW
2200 UT Wednesday WBCQ 7490v to WSW
0130 UT Thursday WRMI 9395 to NNW, 5010 to S
(Glenn Hauser, OK, WOR)

** U S A. WORLD OF RADIO 2114 monitoring: Richard Lemke, Alberta, reports: ``Dear Glenn: World of Radio #2114, confirmed, below with details, B21 season, Keep Christ in Christmas, Details:

5850 kHz, also heard on 9955 kHz, 5850 kHz, 0130, 0142, 0158, S9 signal, 0159, 5850 kHz, Nov 26 UTC 2021
[UT Friday; 9955? Not supposed to be then, rather also 7780]

5950 kHz, jamming, siren, noise, 2337, 2343 (45433), 2359, Nov 26 UTC 2021 [Friday]

5950 kHz, jamming, 0057 (55434), (55433), 0059, 5950 kHz, Nov 28 UTC 2021 [Sunday; if there is jamming how can I=5? Maybe he classifies jamming as N. Only jamming around here is on 5954]

9395 kHz, old style tube TV QRN, 0137, S7 signal, 0159, Nov 29 UTC 2021 [Monday]

9955 kHz, 2331, 2359 (55433), (55434), 2357, Nov 30 UTC 2021 [Tue]

5850 kHz, 1030 (55433), confirmed, 1059, Dec 1 UTC 2021 [Wed]
(Lemke, Richard -AB)``

Confirmed Wed Dec 1 at 2200+ on WBCQ 7489.9v, but JBA into DX-398 with internal random wire; by 2225 it's BA = slightly better so I can recognize it as the current 2114 edition. Next:

0130 UT Thursday WRMI 9395 to NNW, 5010 to S

Full schedule including AM, FM, webcasts, satellite, podcasts:
<http://www.worldofradio.com/radioskd.html>

Our non-commercial broadcasts and website depend on voluntary support. Thanks this week to Steve McGreevy, N6NKS, Keeler CA for a contribution via PayPal to woradio at yahoo.com and says, ``L000000NNNGGG overdue, Glenn(!), and thanks very much for your endless wonderful work for the DX community!``

One may also contribute by MO or check in US funds on a US bank to Glenn Hauser, PO Box 1684, Enid OK 73702 (Glenn Hauser, OK, WOR)

** U S A. 5950, Sat Nov 27 at 2302, WRMI for first airing of `Encore` classical music --- NOT. First hearing Indian classical music, sitar, tabla, etc., then 2311 a `cello sonata alone; 2327 mixture of S Asian and `cello, for rest of hour with no announcements at all until 2359.5 WRMI ID and into Wavescan. This certainly does not match the Tumbril playlist for this week or last. I notified Brice. Nice music but not Encore, which still shows on the System L sked.

5850, UT Sun Nov 28 at 0100-0200, next broadcast of `Encore` on WRMI succeeds, matching the Nov 27 playlist with Brice's commentary. Next repeat on WRMI should be UT Monday at 0300 on 5950 (Glenn Hauser, OK, WOR)

** U S A. 7490, Nov 27 at 0036, WBCQ chex via Maryland remote: this one is S9 but -57 Hz off-frequency = 7489.943 during FKB gospel huxter. 6160 S5 with rock at -52 Hz = 6159.948. 4790 S7 with TOMBS -19.5 Hz = 4789.9805. 3265: NO signal. 9330 S9+10 in WLCR Brazuguese, +0.6 Hz = 9330.0006.

I'm all set for `AAAWWW` on 7490 webcast, UT Sat from 0100: abrupt JIP `WTO` theme, ``Here we go`` interjexion. A&A are somewhat overmodulated especially when they interrupt and try to talk over each other. Allan says it's ``live``. About picking his nose; riding horses, Angela doesn't know how, so is taking lessons? 0113 ``trimulcasting` on 7490, 6160, 4790. 0124, `Amos `n` Andy` was hugely

popular at 7 pm ET, every family listening. Whether old radios should be restored to operational or collected as are, e.g. Atwater-Kents which were very well made. On and on about radios and very little political diatribe this week. 0153 FRW stuff, presumably from last week since this week's isn't out yet. 0156 he finally makes a datestamp, 26 of November, Y00LF 2021; on 7490, 6160, 4790, but specifically says ``3265 not tonight`` (Wolfgang Bueschel reported hearing it a few days ago at a very different time, but never heard here; he since retracted that). Quick look at email including new pirate logs just in from Larry Will. 0159 prayer running over, closing, and 0201 JIP Hal Turner. John Carver's version:

``Tonight's show started on time on 4790, 6160 with a very poor signal and 7490 was not much better. Allan and Angela in the studio and opening talk about horses and mounting and dismounting horses bareback. Then some radio talk and a conversation about an old tube that Allan has on the desk and then into crystal radio sets. Then into commercial radio sets from the late twenties and thirties.

At 0153 Allan reads the highlights from the Free Radio News. A bit of political talk about the IRS and some other governmental agencies at 0155 and then some emails. Program was off the air at 0200. John, Mid-North Indiana`` (Glenn Hauser, OK, WOR)

** U S A. 5970, Nov 25 at 0725, no signal from WEWN Spanish which had been reliable; other USAs on 50m are propagating well, WWCR and WRMI. WEWN has also been missing from its night English frequency 9385 whenever checked; but still on 12050 Spanish days; 15610 English after 1900? (Glenn Hauser, OK, WOR)

** U S A. 5970, Nov 27 at 0725, WEWN Spanish missing again. 12050, Nov 27 at 1618 check, other WEWN Spanish frequency remains, S9 with praise song (Glenn Hauser, OK, WOR)

** U S A. 5970, Dec 1 at 0714, WEWN Spanish is back on with music, S9+10, after absence a few nights (Glenn Hauser, OK, WOR)

** U S A. 3215, Nov 27 at 0728, WWCR-1 is OFF, remaining the other three on 4840, 5890, 5935 (Glenn Hauser, OK, WOR)

** U S A. 5050, UT Sun Nov 28 at 0014, WWRB still on summer frequency/band, contrary to what Dave announced last week, shift to 3215/new 3360. 0200 still on 5050, which is when 3360 was supposed to start instead of 3195 or 3185; eventually? (Glenn Hauser, OK, WOR)

** U S A. 5050, UT Mon Nov 29 at 0037, WWRB still on here instead of expected 3215, so probably not yet on new 3360 either after 0200 altho did not get around to checking. Next weekend? (Glenn Hauser, OK, WOR)

** U S A. 5085, UT Sun Nov 28 at 0055, WTWW-2 with 'TOUTA' already underway so switch to \$tereo webcast; but original recordings of George Wright as a teenage thorganist are mono: no wonder, dating from 1938y? Bob Heil explains how the recording fi was as hi as possible for that era. Finishes at 0140.5, so might have started circa 0040 if an hour long, but you never know. Is it too much to ask for a program to stick to a specific start time, whatever it may be? (Glenn Hauser, OK, WOR)

** U S A. 1130 kHz, Nov 26 at 1501 UT check, KLEY Wellington KS, still running 250 watts of dead air day and night. Undertalk probably remnant of KWKH LA (Glenn Hauser, OK, WOR)

UNIDENTIFIED. Trans-Atlantic JBA MW carrier search, Nov 30 from 0727 UT, not in the order tuned: 621, 684, 693, 711, 747-2, 765-2, 774-2, 828, 846-TP?, 855-2, 882-2, 909, 999, 1089, 1107-2, 1125-2, 1215* --- *strongest.

Note 774, where there are normally two, altho mwoffsets shows nothing more than 3 Hz minus from Spain. But at this late/early hour both W Europe and E Asia could be propagating, remnants converging on deep North America; as Walt Salmaniw, BC reported Nov 28 to IRCA: ``Happen to be listening to 774, and heard a local ID for JOUB (NHK2 Akita) at 0720 UT. 1566 HLAZ booming in already, with readily heard cochannel Chinese. All this via my Masset SDR`` Mwoffsets shows JOUB is exactly 774.0000 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. Trans-Atlantic JBA MW carrier search, Dec 1 from 0202 UT, when signals beyond W Europe are possible but it seems these are not: 531, 585, 684, 774, 837, 882, 999, 1089, 1098, 1116, 1125, 1152, 1215, 1305 kHz (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9245-9250-9255, Nov 30 at 1559, sounds like DRM noise but nonesuch listed (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 13892.4 LSB, Nov 29 at 2323, 2-way in colloquial Spanish vs CODAR: cambio (Glenn Hauser, OK, WOR)

TIPS FOR RATIONAL LIVING

WORLD OF RADIO HITLIST major update Nov 25

Hi Glenn, My latest Hitlist update.

<https://www.w4uvh.net/hitlist.htm>

A huge thank you to Peter Jones who has run the HitList through a URL checker and as a result identified a number of broken links or links which re-direct to new pages. This has prompted a thorough review of the HitList (the entries that I have fixed which were highlighted by Peter as broken are indicated by *PG below).

- 1) The Google translate "button" had stopped working for many links due to a change in the way that Google Translate works, although many also redirect to new format and still work. All buttons fixed to new format (Algeria, Brazil, Cuba, Egypt, France, Germany, Greece, Lao, Morocco, Romania, Russia, Spain, Turkey) (*PG)
- 2) Some general maintenance performed on underlying text file to improved guide/rule lines across page
- 3) Angola - R Nac Angola: Updated link to home page and live stream (*PG)
- 4) Argentina - RAE: Link to frequencies now links to an up to date schedule. Label corrected (Thx to Peter Jones in WORiog)
- 5) Azerbaijan - R Baku: Updated link to R Baku programmes; removed obsolete link to radio live stream (*PG)
- 6) Bangladesh - Bangladesh Betar: Removed obsolete link to radio live stream (*PG); removed obsolete link to frequency page (exists, but is blank)
- 7) Belarus - R Belarus: Updated link to programmes webpage (*PG).
- 8) Bhutan - BBS: Updated link to Live Stream (*PG); added link to programme schedule.
- 9) Brazil - R Nac Amazonia: Removed link to Facebook page (seemingly no longer exists) (*PG)
- 10) Brazil - R Nac Brasilia: Removed link to Facebook page (seemingly no longer exists) (*PG)
- 11) Brazil - R Voz Missionária: Added links to this station
- 12) Cuba - R Progreso: Updated link to live stream (*PG)
- 13) Czech Rep - R Prague Int: removed link to obsolete programme page (*PG)
- 14) Ecuador - HCJB: Added links to Facebook pages; additional link to programmes and link to livestream
- 15) Egypt - R Cairo: Removed links to non-working live streams (Thx to Peter Jones: email from R Cairo advising that they are not going to be fixed)
- 16) Germany - Deutsche Welle: Updated link to DW live stream
- 17) Germany - Hamburger Lokal Radio: Removed links to obsolete shortwave programme and frequency pages and updated links to live stream (*PG)
- 18) Germany - Media Broadcast: Updated link to the Freq Schedule to B-21
- 19) Greece - ERT Triton Programmes: Fixed link that incorrectly connected to Deftero programmes
- 20) Guinea - RT Guinee: Removed link to Facebook page (seemingly no

longer exists) (*PG)

21) India - AIR: Updated links (*PG); added link to AIR Youtube News Channel

22) Indonesia - VOI: Removed link to obsolete programme page and updated link to live stream (*PG): TO FIX LINKS (*PG)

23) Japan - NHK World: Updated link to on-demand webpage (*PG)

24) Netherlands - Mighty KBC: Updated link to live stream (*PG)

25) Palau - Hope R: Removed obsolete links (*PG)

26) Philippines - FEBC: Removed obsolete link to frequencies (*PG): updated links to FEBC Philippines & FEBC International

27) Philippines - R Pilipinas: Updated links (*PG)

28) Philippines - R Veritas Asia: Removed obsolete links (*PG)

29) Poland - R Poland: Updated links to frequencies and programme schedules (*PG); updated links online and podcasts

30) Russia - R Rossi: Removed obsolete links to old Aerostat podcasts and playlists (*PG)

31) Sudan - R Tamazuj: Updated link to broadcast archive (*PG); removed link to obsolete frequency information

32) Syria - R Damascus: Updated link to homepage (*PG)

33) Taiwan - R Taiwan Int: Updated link to current programme schedule

34) Tanzania - TBC: Update link to livestream (although note that the live stream doesn't work on my device for some reason) (*PG)

35) UK - BBCWS: Updated obsolete iplayer links to BBC Sounds Live & Podcasts and the A-Z programme search (*PG)

36) USA - KNLS: Removed link to an obsolete programme page (*PG)

37) USA - KVOH: Removed link to an obsolete live stream link (*PG)

38) USA - VOA: Updated link to VOA Daily schedule (*PG)

39) UK - WMRI Europe: Added link to WMRI Live stream player

40) USA - WEWN: Updated link to WEWN live stream (*PG); Added link to Fe Hecha Cancion podcasts

41) Vatican - Vatican News: Removed link to obsolete RSS feed (*PG)

42) Zanzibar - ZBC: Removed link to inactive domain (placeholder entry retained in case domain is revived) (*PG)

The next update is scheduled for the end of December.

Best wishes and 73, Alan Roe, UK, Nov 25
